AIR-COOLED TURBO AIR COMPRESSOR SA SERIES

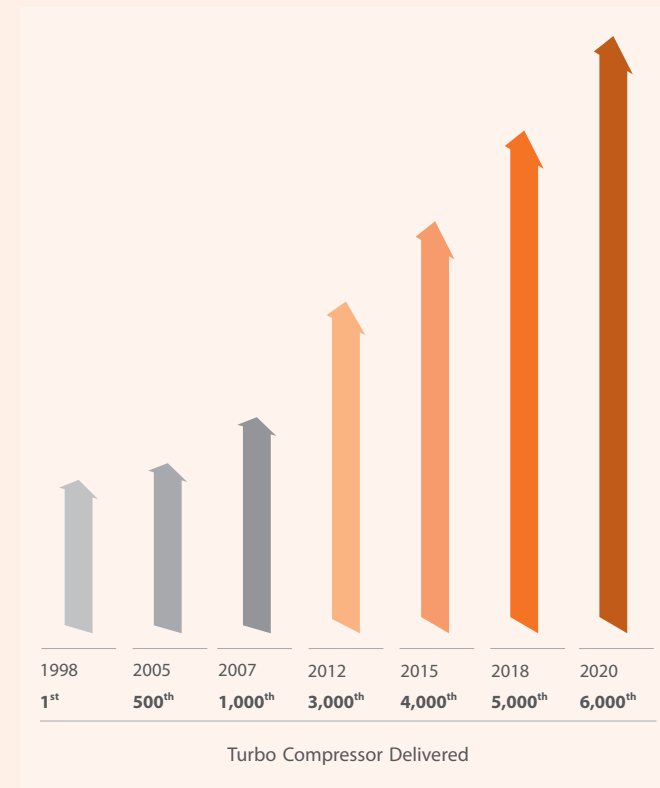

History

Based on over 40 years of accumulated experience in precision machine industry from Gas Turbine to Compressor Business, Hanwha Power Systems has been chosen by more than 1,500 customers worldwide.

- **1977** · Company Established (Samsung Techwin) in Samsung Group
- **1979** · Overhaul and Repair of Aircraft Gas Turbine Engines
- **1992** · Started Developing Industrial Gas Turbine
- **1997** · First model of Turbo Compressor Introduced
- **2011** · Penetrated into Gas Compressor Market
- **2013** · SA3100, the World's Largest Capacity of Air Cooled Compressor, Introduced
· ISO8573-1 (Class 0) Certified
- **2014** · Contract to Supply the World 1st Integrally Geared Centrifugal Compressor for Offshore VRU Application 2015
- **2015** · New Beginning in Hanwha group as "Hanwha Techwin"
· Penetrated into the Offshore Market with Turbo Air & Gas Compressors
· Launched Long-term Aftermarket Service Program
· Expanding Portfolio by Cooperation with Screw Compressor Manufacturers
- **2016** · Saudi Aramco Approved Vendor registered (AP1617 Process Compressor & Blower)
· Reciprocating Compressor Package Agreement with GE Oil&Gas
- **2017** · MOU Signed with KEPCO to Jointly Develop Oxy-Fuel Gas Turbine Technology
· New Beginning as "Hanwha Power Systems"
- **2018** · Launched Turbo Expander Generator (TEG), an Environment friendly Energy Solution
· Hydrogen Compressor Package Agreement with PDC
- **2019** · Authorized Service Center Agreement (for Korean market) with Baker Hughes
· ADNOC (Abu Dhabi National Oil Company) Approved Service Vendor Registered
- **2020** · Contract to supply a hydrogen refueling system for a Korea Gas Corporation (KOGAS) energy complex

Hanwha Power Systems is one of the fastest growing solution providers in its industry since 1997. During the last two decades Hanwha Power Systems delivered over 6,000 units of turbo compressors worldwide.

Industries & Applications

Upstream & Offshore

- Flash Gas, LP, MP
- Vapor Recovery / Instrument Air

Refinery

- Make-up, Recycle, Booster (H₂, Wet)
- Sulfur Recovery / Process Air / Instrument Air

LNG

- Boil off gas (Terminal, LNG Plant)
- High Pressure (Terminal)
- Low / High duty (LNGC, LNG FPSO)

Power Generation

- Fuel Gas Booster / N₂ booster (IGCC)
- Syngas / Instrument Air

Air Separation

- Main Air / Booster Air or N₂
- Cryogenic Expansion

Fertilizer / Gas Processing

- Process Air / Process Gas (NG, NH₃, CO₂)
- N₂ Booster / Instrument Air / NGL

Petro-chemical

- High Pressure (Terminal)
- Refrigeration (Propane, Propylene)
- PTA / Boil off gas / Process Air / Instrument Air

Environment & Energy Saving

- Aeration for wastewater treatment
- Pneumatic conveying materials
- Mechanical vapor recompression

Hanwha Power Systems is proud to introduce the SA Series, air-cooled turbo air compressor, designed with proven technology. SA Series does not need cooling water supply so customers can achieve savings in water consumption, water treatment, and cooling water tower installation. SA Series provides an improved performance map for customers in various industries especially in areas with water scarcity or bad water quality, severe coldness area and high mountain region.

Benefits

No Cooling Water Tower Needed

With air cooling fan, customer does not need to make an investment for a cooling water tower and water supply

High efficiency

5-axis machined impellers and optimized pinion speeds using industry proven bearing and seal technologies
-API 672 standard applicable

Precise Control

Full PLC controller and total control monitoring system available

Low Operation Costs

Easy maintenance structure and components designed for extended life are applied

"SYSTEM" package solutions available

Easy and quick installation with all standard or optional accessories pre-mounted (plug & play)

Optimized Design

Each frame has optimized pressure and flow cuts for actual system air requirements

Proven technology

Based on over 5,000 installed plant air, system air, process air and engineered air compressor units

Applications

- Steel, Minerals and Mining, Power plants
- Food and Beverage processing plants
- Oil Refinery, Petrochemical/Chemical
- Electronics, Textile, Automotive, Aerospace and Aviation
- Small and medium sized Air Separation
- Water shortage area and high mountain region

A Package Full of Customer Value

04

Inlet Guide Vanes

Highly efficient variable inlet guide vanes

- Optimizes the control of the air flow through the efficient regulation of inlet air
- Improves the performance of compressor with part load control and reduces power consumption

Cooling System

Efficient cooler module

- Easy maintenance
- VFD cooler motor to minimize power according to the site climate
- Flexible Noise Control
 - SA2100 : Standard 85dB, Option 80dB
 - SA3100 : Standard 90dB, Option 85dB

Main Drive Motor

Saving energy costs with high efficiency packaged motor

- Custom motors available for different environments(Optional)

Gear Box

Horizontally split gearbox for easy access and maintenance

- Horizontally split structure allows fast inspection and easy access to major components
- Inspection and maintenance checks at minimum costs

Lubrication System

Complete lubrication system package

- Oil reservoir, auxiliary oil pump, oil heater, oil demister
- Compact design for minimal foot print
- High grade 10 μ m filter prevents impurities to gearbox
- Air-cooled oil cooler

Control System

User-friendly control and monitoring system

- Easy-to-use HMI and high resolution LCD panel
- Various hardwired connections and serial communications available

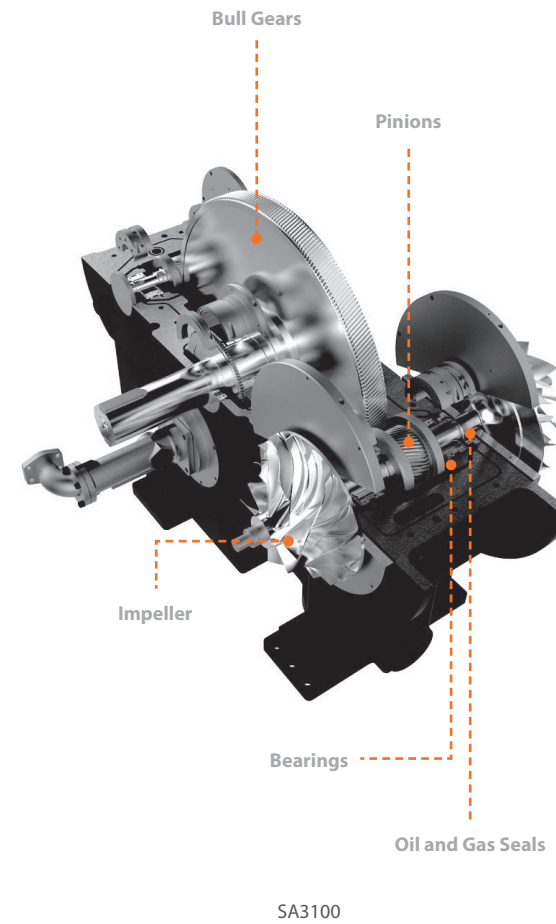

SA2100

SA3100

Designed to Modern Engineered Standards

AIR-COOLED • 05
TURBO AIR COMPRESSOR

Bull & Pinion Gears

High precision AGMA 12 & 13 gearing system

- Optimized gear design reduces noise
- Long life time and minimal mechanical loss
- Individually replaceable pinion and bull gear for easy maintenance

Impellers

State of the art master impeller in 17-4 PH stainless steel

- High efficiency 5-axis machined backward swept impellers
- High turndown capability
- Parts balanced in accordance with API672

Bearings

Reliable split bearing systems

- Tilting pad journal bearings applied on pinion gears provide stable operation
- Low friction loss sleeve journal and taper landed bearings and thrust collars
- RTD incorporated into the bearings (SA3100 option)

Oil and Gas Seals

Sealing system satisfies API specification

- No need for extra compressed air for sealing
- Perfect prevention of air and oil leakage
- Split type for ease of maintenance

Maximum Energy Saving

Hanwha Power Systems compressors provide customers lower life-cycle costs with high efficiency oriented components and low maintenance design. Wear resistance materials as stainless steel minimizes abrasion and corrosion, and simple and no wearing structure saves maintenance time and costs. Flexible IGV adjusting the flow rate in accordance with the fluctuation of air consumption reduces energy consumption.

Life Cycle costs

Specification

Model		SA2100	SA3100
Capacity	m ³ /hr	1,200-2,890	3,750-5,500
	CFM	700-1,680	2,200-3,250
Motor	kW	150-260	400-580
	HP	200-350	540-780
Discharge Pressure	bar A	3.5-11.4	3.5-11
	psi A	50-165	50-160
Dimension (LxWxH)	mm	Compressor	3,000x2,500x1,900
